

Report Period: Aug 17-30

Project 19

Summary of Progress in this Period

During this time period we were able to conduct 3 successful meetings. The first meeting consisted of us all getting to know each other and establishing means of communication. We all got each other's information's down, made a discord site for the entire group, and talked about what experiences we've had at ISU. The second meeting was held with our Faculty Advisors and our Stake Holder of the project. It was good having a meeting with our Stake Holder named Andrew. He was able to give us a glimpse of the project and what we can research so we can start preparing for our project. Finally, the last meeting we had was simply just a check-in type meeting. We decided to have our meetings every Friday so we can talk about the progression of our project and what should we be working on as the semester progresses.

Pending Issues

We decided as a group we each lack a little bit of information of each topic of the project in some way. To fix that issue as a group, we wanted to research each topic that we didn't feel comfortable in.

Plans for Upcoming Reporting Period

Andrew had given us a couple of files to look at that pertained to our project. We also wanted to conduct thorough research toward the topic we felt less comfortable in, then report back in our weekly meetings to discuss amongst our group.
