

Team Name: sdmay21- 16

Team Members: Ryan Burgett, Giovanni Mejia, Jordan Heim, Eric Reuss, Presiiian Iskrenov, Benjamin Fedderson

Report Period: Oct 19-Nov 1

### **Summary of Progress in this Period**

We had an assignment based on reflections for engineering standards, and we discussed all the standards that we agreed that related to our project. We also collected feedback on our version 2 design document for our project. The comments were nothing terrible, our grader just wanted more in depth answers to our testing sections. We finally have all our necessary IP and NDA forms, so that can be crossed off the list of assignments needed to be done.

---

### **Pending Issues**

Final presentations, and Final version of our Design Document.

---

### **Plans for Upcoming Reporting Period**

Discuss the final presentation for the end of the semester in front of our faculty member and our advisor. We also discussed uploading information to our team website. We need to set up a time and discuss who is talking about what things in our final presentation.
